Homework-Groovy-LoWT

Create a final exam calculator
    Takes in three different inputs from the user
        Final exam worth
        Current Grade
        Grade Desired
The output will be the grade that the user will need to get on the final exam to get the grade desired in the class.

```
run-single:
Enter your total grade so far: 82
Enter the grade you wish to recieve: 80
Enter the amount the final is worth: 25
You will need to get a: 74
BUILD SUCCESSFUL (total time: 15 seconds)
